## Himalayan Mineral Rock Salt

### A natural supplement for livestock and poultry

Himalayan Crystal Mineral Rock Salt is sourced from a very remote location in the Himalayan Mountains. It is in its original form the exact way it was formed and crystallized over 200 million years ago. Minrosa from this location contains 92 of the natural minerals and trace elements that assist the body to function optimally. These nutrients are in their naturally occurring form making them easier to digest, absorb and metabolize.

Minrosa is beneficial to sheep, cattle, goats, pigs, deer, alpacas, horses or any other animal in a confined or free range feed situation. Poultry will benefit when Minrosa is dissolved in their water.

### Advantages

- No added sweeteners
- If they need it they lick it
- Won't break down with rain/sun
- No waste-won't contaminate soil
- Economical
- Unused nutrients passed into the soil
